Shenyu Qin

(+86)177-1707-1290 qinshenyu29@gmail.com 1cupcelery.github.io

Education

Shanghai Jiao Tong University Shanghai, China
John Hopcroft Honors Class, Zhiyuan College Aug 2022 – Jun 2026
B.Eng. in Computer Science and Technology

- GPA: 3.76/4.3 (88.75/100)
- Relevant Coursework: Mathematical Analysis (H), Linear Algebra (H), Combinatorics, Probability, Optimization Methods, Machine Learning, Natural Language Processing and Large Language Models, Information Theory, Data Mining, Online Algorithms, Topics in Modern Algorithms, Computational Complexity, Statistical Learning Theory

Employment

Hong Kong University of Science and Technology Hong Kong, China
Department of Computer Science and Engineering Nov 2026 – May 2027 (expected)
Research Assistant
Advisor: Yaonan Jin

Publications

Authors are listed alphabetically, as is customary in theoretical computer science.

Winning in the Limit: Average-Case Committee Selection with Many Candidates [arXiv]
Yifan Lin, Shenyu Qin, Kangning Wang and Lirong Xia
In *Proceedings of the 27th ACM Conference on Economics and Computation* (EC 2026)

Preprints

A 1/2-Approximation for Pandora's Problem with Deadlines [arXiv]
Shenyu Qin, Chihao Zhang, Yuhao Zhang and Zixuan Zhu

Research Experience

Hong Kong University of Science and Technology Remote
Advised by Yiding Feng and Yaonan Jin Sep 2026 – Present

- Studied the sample complexity of testing distributional properties including MHR, regularity, quasi-MHR and quasi-regularity.

Shanghai Jiao Tong University Shanghai, China
Advised by Chihao Zhang and Yuhao Zhang Jan 2026 – Present

- Studied the Pandora's problem with deadlines; also studied the ProbeMax problem, focusing on the adaptivity gap and the approximation guarantee of the non-adaptive greedy algorithm.
- Co-authored paper "A 1/2-Approximation for Pandora's Problem with Deadlines".

DIMACS, Rutgers University Piscataway, NJ
Advised by Kangning Wang and Lirong Xia Aug 2025 – Dec 2025

- Studied the existence of α-winning and α-dominating committees of size k in an impartial culture when the number of candidates is much larger than the number of voters; the project established sharp threshold values of α, as functions of k, for both notions.
- Co-authored paper "Winning in the Limit: Average-Case Committee Selection with Many Candidates", which appeared in EC 2026.
- Participated in Rutgers Theory of Computing Seminar.

Shanghai Jiao Tong University Shanghai, China
Advised by Yuhao Zhang Jul 2024 – Mar 2025

- Studied the online load balancing problem under random-order arrivals and its special case, the online graph balancing problem, focusing on the gap between known upper and lower bounds.
- Participated in TCS reading group.

Teaching Assistantships

Algorithm Design and Analysis (CS3950), Shanghai Jiao Tong University — Spring 2026

Honors and Awards

Zhiyuan Honors Scholarship (Top 10%), Shanghai Jiao Tong University — 2022, 2023, 2024, 2025

Skills

Programming: C++, C, Python, Rust

Tools: LaTeX, MATLAB, Coq

Languages: Mandarin (Native), English (TOEFL: 104)
