

Shenyu Qin

☎ (+86)177-1707-1290 ✉ celery2022@sjtu.edu.cn 🌐 1cupcelery.github.io 📍 Shanghai, China

Education

Shanghai Jiao Tong University

Undergraduate in Computer Science (John Hopcroft Honors Class)

Shanghai, China

Sept. 2022 – Present

- GPA: 3.78/4.3 (89.03/100)
- Relevant Coursework: Mathematical Analysis II (93), Combinatorial Mathematics (91), Probability Theory (91), Computational Complexity (98), Online Algorithms (95), Statistical Learning Theory (97)

Research Experience

Shanghai Jiao Tong University

Advised by Prof. Yuhao Zhang and Prof. Chihao Zhang

Shanghai, China

Jan. 2026 – Present

- Studying the adaptivity of the Probemax problem.

DIMACS, Rutgers University

Advised by Prof. Kangning Wang and Prof. Lirong Xia

Piscataway, NJ

Aug. 2025 – Dec. 2025

- Studied the existence of α -winning and α -dominating committees of size k in an impartial culture when the number of candidates m is much larger than the number of voters n .
- Established two sharp thresholds for α : an α -winning committee exists w.h.p. iff $\alpha < \frac{k-1}{k}$, and an α -dominating committee exists w.h.p. iff $\alpha < \frac{k-1}{2k}$, when m is sufficiently larger than n and $n = \omega(1)$.
- Wrote a manuscript based on the results.

Shanghai Jiao Tong University

Advised by Prof. Yuhao Zhang

Shanghai, China

Jul. 2024 – Mar. 2025

- Studied the online load balancing problem for random order inputs, aiming to close the gap between the $\Omega(\sqrt{\log m})$ lower bound and the $O(\log m / \log \log m)$ upper bound by designing an $O(\sqrt{\log m})$ -competitive algorithm, where m is the number of machines.
- Investigated the online graph balancing problem, which is a special case of the original problem, trying to analyze the competitive ratio of a newly-designed algorithm in this case.
- Participated in TCS Reading Group every week.

Publications

Authors are listed alphabetically unless otherwise noted.

Winning in the Limit: Average-Case Committee Selection with Many Candidates [\[arXiv\]](#)

Yifan Lin, **Shenyu Qin**, Kangning Wang and Lirong Xia

To appear in the 27th ACM Conference on Economics and Computation (EC 2026)

Teaching Assistantships

Design and Analysis of Algorithms (CS3950), Shanghai Jiao Tong University

Spring 2026

Honors and Awards

Zhiyuan Honors Scholarship (Top 10%), Shanghai Jiao Tong University

2022, 2023, 2024, 2025

Skills

Programming C++, C, Python, Rust

Tools: L^AT_EX, MATLAB, Coq

Languages: Mandarin (Native), English (TOEFL: 104)
