Education

Shanghai Jiao Tong University

Sept. 2022 – Present

Undergraduate in Computer Science (John Hopcroft Honors Class)

- GPA: 3.78/4.3 (89.03/100)
- Relevant Coursework: Mathematical Analysis II (93), Combinatorial Mathematics (91), Probability Theory (91), Computational Complexity (98), Online Algorithms (95), Statistical Learning Theory (97)

Research Experience

Pandora's Box Problem with Deadlines

John Hopcroft Center, SJTU

Advised by Prof. Yuhao Zhang

Jan. 2026 – Present

- Ongoing

Existence of α -winning and α -dominating committees in an Impartial Culture

DIMACS, Rutgers University

Aug. 2025 – Dec. 2025

Advised by Prof. Kangning Wang and Prof. Lirong Xia

- Studied the existence of α -winning and α -dominating committees of size k in an impartial culture when the number of candidates m is much larger than the number of voters n
- Established two sharp thresholds for α : an α -winning committee exists w.h.p. iff $\alpha < \frac{k-1}{k}$, and an α -dominating committee exists w.h.p. iff $\alpha < \frac{k-1}{2k}$, when m is sufficiently larger than n and $n = \omega(1)$.
- Wrote a manuscript based on the results

Online Load and Graph Balancing for Random Order Inputs

John Hopcroft Center, SJTU

Advised by Prof. Yuhao Zhang

Jul. 2024 – Mar. 2025

- Studied the online load balancing problem for random order inputs, aiming to close the gap between the $\Omega(\sqrt{\log m})$ lower bound and the $O(\log m / \log \log m)$ upper bound by designing an $O(\sqrt{\log m})$ -competitive algorithm, where m is the number of machines.
- Investigated the online graph balancing problem, which is a special case of the original problem, trying to analyze the competitive ratio of a newly-designed algorithm in this case
- Participated in TCS Reading Group every week

Preprints

Winning in the Limit: Average-Case Committee Selection with Many Candidates

[arXiv](#)

with Yifan Lin, Kangning Wang and Lirong Xia

Teaching Experience

Design and Analysis of Algorithms (CS3950), Teaching Assistant, SJTU

Spring 2026

Honors and Awards

Zhiyuan Honors Scholarship (Top 10%), SJTU

2022, 2023, 2024, 2025

Skills

Programming Languages: C++, C, Python, Rust

Software: L^AT_EX, MATLAB, Coq

Languages: Mandarin (Native), English (TOEFL: 104)
